

make your move to cloud

Cloud Applications Development

Cloud services have significantly dropped the costs of developing custom applications and has enabled companies to explore a wider range of software to develop their applications on cloud

Cloud Adoption & Migration

We combine our cloud experience, the AWS Cloud Adoption Framework, and Cloud best practices to ensure you have a holistic approach and roadmap to cloud adoption and execute the migration of your existing systems and applications

Managed Services

AWS is as complex as it is powerful. This requires niche expertise and a whole lot of time to ensure that the apps are available 24X7. We have a team of Niche experts who handle these operations for our customers

Solution Architecture and Design

Our Cloud Architects have expertise in designing architecture on AWS to ensure that the applications run on a high performance and highly scalable and secure architectures using the latest AWS services while keeping the opex costs low

Security & Business Continuity

No business would like to see downtimes and disruptions in their Business Operations which may impact revenues and growth. Our experts ensure that the cloud applications are architected for resiliency and business continuity in case of disaster.
